DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Stevens et al. (Stevens; US 6,353,663; cited and applied for the first time).

Stevens plainly teaches the claimed invention. The claimed invention reads on Stevens as follows. The claimed node reads on the SCP of Stevens; the claimed source reads on the calling party; the claimed destination reads on the called party; the claimed information/account/history reads on the contents of the call screening service database/back office billing 22; the claimed modification of information/account is taught at column 4, line 54 – column 5, line 54. The limitations of claims 3-5, 8-10, 13-15, and 18 are taught at column 3, lines 1 – 10 and column 5, lines 10 – 39.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bell et al. teach another method for eliminating unwanted telephone calls where a user has the option of accepting calls from unregistered callers for compensation.
